FAQs

FAQ Question	What is the Shot of Steam?
FAQ Answer	Double pressing the steam button instantly produces a powerful shot of steam to help relax the fabric fibres and remove extra stubborn wrinkles.

FAQ Question	Why is 2100 watt of power important?
FAQ Answer	The powerful 2100W element provides a fast 35 second heat up, and a higher-pressure steam shot to remove tough wrinkles

FAQ Question	What type of fabrics are suitable for a Steamer?
FAQ Answer	The Elite TEMP Press Plate has a higher temperature and is suitable for all ironable fabrics from delicates to cotton & linen** ** Steam Temperature setting up to 177°C is suitable for all ironable fabrics from delicates to cotton/ linen

FAQ Question	Can I use my Garment Steamer vertically and horizontally?
FAQ Answer	Hold the steamer up vertically to freshen up hanging garments, suits, dresses, shirts etc. It also boasts a long 3m cord to freshen up curtains, cushions, pet beds and hard-to-wash items around the home. Use horizontally on an ironing board or bed (with a towel covering) to press and steam your garments.

FAQ Question	Can I use it to freshen furnishings & pet beds?
FAQ Answer	Steam is ideal to freshen furnishings around the home including curtains, cushions, pet beds and other hard-to-wash items

FAQ Question	Why is CeraFlow™ Ceramic press plate coating necessary on a Garment Steamer?
FAQ Answer	The CeraFlow™ Ceramic press plate is an extra tough, durable ceramic coating, that is up to 7x more scratch resistant* against pesky zippers, buttons, sequins etc. * vs stainless steel
