Feature & Benefit Images

7-star energy rating

Flexible drying options

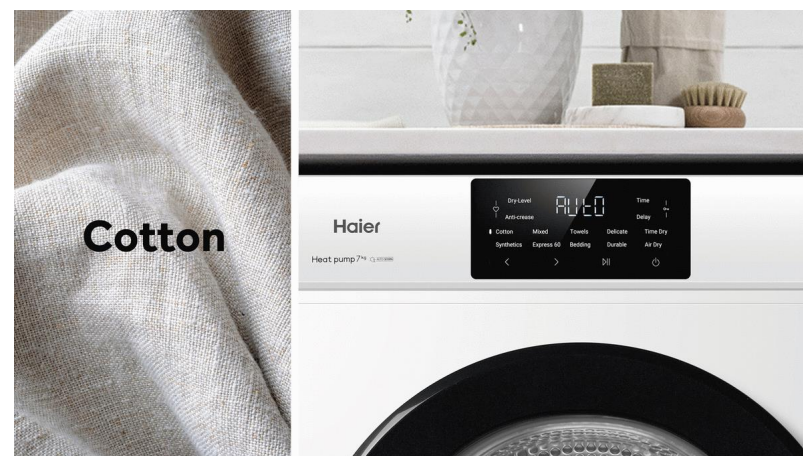

Auto-sensing technology

Dry clothes, dry home

Slimline design

10 specialised dry cycles

Approved Feature Copy

7-star energy rating

Care for your clothes better with heat pump technology. This dryer dries clothes gently at lower temperatures, consuming 59% less energy than a 2-star vented dryer.*

**Based on a 2-star energy rated vented dryer with 315kWh annual consumption, as per energy label texts*

Auto-sensing technology

Auto-sensing technology gently cares for your clothes by detecting the moisture level in each laundry load, which helps prevent both over-drying and under-drying.

Slimline design

Designed for flexible placement, our first slimline dryer easily fits into shallow cabinetry and compact spaces. It features a dark touch-control panel set against a white exterior, complementing any Haier washing machine.

Flexible drying options

Tailor your drying easily with five options to suit any load, plus a convenient Anti-crease function for less ironing.

Dry clothes, dry home

This dryer uses heat pump technology to dry your clothes, without releasing moisture to your home. It's a gentle way to care for your fabrics while keeping your home dry.

10 specialised dry cycles**

Care for a variety of fabrics with dedicated dry cycles including Delicate, Towels, Durable and Express 60.
