Beautifully crafted design. IP68 underwater protection<sup>1</sup>. Ultra Pixel 50MP camera system. Introducing **motorola edge 50 fusion**. Your smartphone is now art.

## KEY SELLING POINTS

Short (5-word max)

1. Beautifully crafted, fully protected<sup>1</sup>
2. Ultrafast 68W TurboPower™ charging<sup>2</sup>
3. Ultra Pixel 50MP camera system
4. 6.7" endless edge display and Dolby Atmos®
5. Blazing-fast performance
6. Moto Secure and fingerprint on display

Long (20-word max)

1. **Beautifully crafted, fully protected.** Enjoy an ultrathin, lightweight, symmetrically curved design featuring IP68 underwater protection.<sup>1</sup>
2. **Ultrafast 68W TurboPower™ charging.** Get power for the day in just 15 minutes of charging.<sup>2</sup>
3. **Ultra Pixel 50MP camera system.** Capture bright, detailed photos and videos in any light—brilliant results with 32x more focusing pixels.<sup>3</sup>
4. **6.7" endless edge display and Dolby Atmos®.** Enjoy shows and movies with infinite contrast and vibrant colors, all backed by multidimensional sound.
5. **Blazing-fast performance.** Power your day with a Snapdragon® 7s Gen 2 processor, up to 12GB of memory with RAM Boost<sup>11</sup>, and up to 256GB storage.<sup>4,10</sup>
6. **Moto Secure and fingerprint on display.** Keep your personal information protected while enjoying fast, secure access to your phone.

## DETAILED FEATURES & BENEFITS

*(In priority order)*

### Design

#### Summary

#### **Beautifully crafted design**

We designed **motorola edge 50 fusion** to be impressive at a glance and in your grip. The symmetrical curved inlay makes it comfortable to hold, aligning perfectly with your hand's natural contours. Even the camera housing blends seamlessly with symmetrically curved sides. At the same time, the endless edge design gives the ultrathin, lightweight body a sleek, refined look. Choose a Hot Pink vegan suede or a Marshmallow Blue vegan leather finish for a soft, tactile feel with an added touch of luxury. Or go with a sophisticated PMMA finish in Forest Blue.<sup>4</sup>

#### IP68 protection<sup>1</sup>

#### **Worry-free underwater protection<sup>1</sup>**

**motorola edge 50 fusion** is engineered to give you everyday peace of mind. The IP68 rating means it can withstand dust, dirt, and sand, along with submersion in 1.5 meters of fresh water for up to 30 minutes.<sup>1</sup> Now, getting wet is just one less thing to worry about.

#### Gorilla Glass

#### **Scratch-resistant screen**

Help better protect your display from damage with Corning® Gorilla® Glass 5.

### Charging & Battery

#### Summary

#### **Power for the day in 15 minutes<sup>2</sup>**

Fuel up fast with 68W TurboPower™. It gives you power for the day in just 15 minutes of charging<sup>2</sup>. And with a 5000mAh battery, with over 30 hours of battery life, for all the things you want to do.<sup>2</sup> Binge-watch that new series, stay in touch with friends, and capture the world around you—day and night.

#### TurboPower

#### **Fuel up fast**

No one likes stressing about a low battery, especially before a big night out or a busy day at work. 68W TurboPower™ gives you power for the day in just 15 minutes of charging, so you can refuel quickly and get back to what matters.<sup>2</sup>

5000mAh battery (Generic claim)

### **Unbelievable battery life**

Leave any worries about power behind. The massive capacity 5000mAh battery keeps you listening to playlists longer, video chatting with friends for hours on end, and binge-watching your favorite series until the dramatic conclusion.<sup>2</sup>

5000mAh battery (Specific claim)

### **Over 30 hours of battery life<sup>2</sup>**

Leave any worries about power behind. The massive capacity 5000 mAh battery keeps you working and playing for over 30 hours.<sup>2</sup>

## Camera

Summary

### **Day and night. Far and near.**

**motorola edge 50 fusion** is packed with advanced camera technology, so you never miss a moment. The 50MP camera is designed for outstanding night photography thanks to a large Ultra Pixel sensor, Optical Image Stabilization (OIS), and advanced all-pixel focus technology. Not to mention the powerful LYTIA™ sensor, providing ultrafast performance in darker environments. There's also a 13MP ultra wide-angle camera that fits 4x more of the scene in your frame. And integrated Macro Vision brings you 4x closer to your subject than a standard lens, so you can capture the tiniest of details. In front, the 32MP Quad Pixel selfie camera is always up for social-ready snaps.

50MP Ultra Pixel camera

### **Take your best shots at night**

**motorola edge 50 fusion** was designed for the dark, with three advanced features to help you make the most of photography at night. The 50MP main camera uses a powerful LYTIA™ LYT-700C sensor for ultrafast capture with low noise in dark environments. The Ultra Pixel sensor captures more light with larger 2.0µm pixels. OIS automatically smoothes out involuntary hand motion, allowing the sensor more exposure time to let in more light. And advanced all-pixel focus technology elevates night photography with faster, more accurate performance thanks to 32x more focusing pixels.<sup>3</sup>

OIS

### **Unshakable images**

The slightest move can ruin a great moment. Optical Image Stabilization (OIS) automatically compensates against blurred images and videos due to

unwanted camera movement, so even when an exposure takes longer—say, in low light conditions—clarity and detail shine through.

#### All-pixel focus

##### **Our fastest, most accurate autofocus**

Focus on getting brilliant results. With 32x more focusing pixels, you'll experience faster, more accurate performance in any light.<sup>3</sup>

#### 13MP Ultrawide + Macro Vision

##### **Go ultra wide or get close up**

One advanced sensor. Two amazing perspectives. The 120° ultra-wide angle lens captures what your eyes see, fitting more of the scene in your frame than a standard lens. The Macro Vision lens brings you 4x closer to your subject, so you see the tiniest of details.

#### 32MP front camera

##### **High-res selfies. Next-level videos.**

Stunning high-resolution photos are a snap thanks to a dedicated selfie camera. Quad Pixel technology combines every four pixels into one for 4x better low-light sensitivity and brilliant results. Plus, capture videos in 4K resolution and never miss a detail.

## Camera software features

#### Google Auto Enhance

##### **Stunning photos in a snap**

Motorola and Google Photos have teamed up to take the guesswork out of perfecting your photos. Auto Enhance is now built into the camera, instantly adjusts color and lighting after you shoot. This automatically improves white balance, exposure, highlights, shadows, contrast, saturation, and more. Just turn on Auto Enhance and let your camera do the rest.

#### Tilt-shift Mode

##### **Shift your perspective**

Shoot portraits with multiple points of focus. Or stretch your imagination by creating a miniature effect. With **motorola edge 50 fusion**, you can alter an image's depth of field to create the perspective you want to emphasize in your composition.

#### Video horizon lock (available on ultrawide camera only)

##### **Stay locked onto the action**

Shoot extreme action videos without worrying about the camera staying level. The new horizon lock feature keeps your shot stabilized even while the camera rotates up to a full 360 degrees. Plus, the processing happens in real-time, without latency, so what you see in the viewfinder preview is what you get.

Hyperlapse

### **Timelapse with a twist**

Shoot a timelapse video while in motion and smooth out unwanted jerks, shakes and bounces thanks to post-capture stabilization.

Slow motion

### **See what you're missing**

Focus on the details your eyes miss at normal speed. Slow motion captures up to 240 frames per second.

Audio zoom<sup>5</sup>

### **Hear only what you see**

Audio Zoom uses advanced microphones to capture the sound of your subject, while filtering out ambient noise and voices.<sup>5</sup> So now your videos include only the audio that's intended.

Auto Smile Capture<sup>6</sup>

### **Everyone looks their best**

Take the perfect group photo in a single shot with Auto Smile Capture. The camera analyzes your subjects and automatically captures a photo when everyone in the frame is smiling, based on a smile detection algorithm.<sup>6</sup>

Dual Capture

### **Like having your own camera crew**

Record video or shoot photos using the rear and selfie cameras at the same time. With Dual Capture mode, both you and your subject are continuously being captured in split screen, so you never miss any of the action—or your reaction.

Panorama

### **All around great photos**

Capture complete, 360-degree panoramic photos to record everything around you.

Pro mode

### **Get professional**

Get ultimate control by using the settings you'd expect to find on a professional SLR camera. Switch to Pro mode to adjust the white balance, shutter speed, ISO, exposure compensation, and focus.

#### Night Vision

##### **Own the night**

Switch to Night Vision mode in extremely low light conditions to bring more details out of the dark. By combining multiple frames at different exposures, you get bright, vivid photos with stunning clarity and more accurate colors.

#### Portrait mode

##### **Power to the portrait**

Add an artistic blur effect in the background for professional-looking photos.

#### Photo Booth (available on front camera only)

##### **Step into your own photo booth**

Who doesn't love taking a few snaps with friends inside a photo booth? Now you can have one in your pocket. Get four different poses in four perfectly timed pictures, all triggered by a simple open palm gesture. Then see your results stitched together in Google Photos. With Photo Booth, you call the shots.

## Cinematic Entertainment

#### Summary (Cusco ROW) [For LATAM + Japan]

##### **Experience entertainment at its best**

Your favorite movies, shows, and games deserve great sight and sound. Bring it all to life on a 6.7" pOLED display with infinite contrast and cinematic color. Get a continuous view from edge to edge. Enjoy smooth, fluid views thanks to a lightning-fast 120Hz refresh rate.<sup>7</sup> Plus, listen to sound all around you with Dolby Atmos<sup>®</sup> and stereo speakers.

#### Summary (Cusco+) [For EMEA + AP, except Japan]

##### **Experience entertainment at its best**

Your favorite movies, shows, and games deserve great sight and sound. Bring it all to life on a 6.7" pOLED display with infinite contrast and cinematic color. Get a continuous view from edge to edge. Enjoy smooth, fluid views thanks to a lightning-fast 144Hz refresh rate.<sup>7</sup> Plus, listen to sound all around you with Dolby Atmos<sup>®</sup> and stereo speakers.

#### Display Summary (Cusco ROW) [For LATAM + Japan]

##### **Cinematic in every sense**

Bring your favorite entertainment to life on a 6.7" pOLED display. With an endless edge design, it gives you a continuous view from one edge to the other. Plus, it meets cinematic standards for color range, brightness, color accuracy, and contrast level, so everything looks exactly as it should. Experience over a billion shades of true-to-life color with improved brightness and contrast. And enjoy it all with a super smooth 120Hz refresh rate.<sup>7</sup>

Display Summary (Cusco+) [For EMEA + AP, except Japan]

### **Cinematic in every sense**

Bring your favorite entertainment to life on a 6.7" pOLED display. With an endless edge design, it gives you a continuous view from one edge to the other. Plus, it meets cinematic standards for color range, brightness, color accuracy, and contrast level, so everything looks exactly as it should. Experience over a billion shades of true-to-life color with improved brightness and contrast. And enjoy it all with a super smooth 144Hz refresh rate.<sup>7</sup>

120Hz refresh rate<sup>7</sup> (Cusco ROW) [For LATAM + Japan]

### **Super-smooth games and websites**

Go easy on your eyes with an incredibly fluid 120Hz refresh rate.<sup>7</sup> It makes switching between apps, playing games, and scrolling websites feel smooth and seamless. Plus, the refresh rate adjusts automatically based on the type of content on the screen to help save battery life.

144Hz refresh rate<sup>7</sup> (Cusco+) [For EMEA + AP, except Japan]

### **Super-smooth games and websites**

Go easy on your eyes with an incredibly fluid 144Hz refresh rate.<sup>7</sup> It makes switching between apps, playing games, and scrolling websites feel smooth and seamless. Plus, the refresh rate adjusts automatically based on the type of content on the screen to help save battery life.

pOLED and 100% DCI-P3 color gamut

### **Infinite contrast. Cinematic color.**

Experience the infinite contrast of deeper blacks and richer colors on a vivid pOLED display. Plus, enjoy 100% of the DCI-P3 color gamut, with brighter, more vibrant colors that meet cinematic standards for accuracy.

High brightness mode

### **See clearly in the sun**

No more squinting in sunlight. High brightness mode automatically adjusts the display outdoors so it's easier to see, reaching peak brightness levels of up to 1600 nits.

Audio overview

## Sound from every direction

Immerse yourself in the multidimensional sound of Dolby Atmos®. And listen with improved bass, vocals, and clarity on large stereo speakers.

Dolby Atmos®

### Add a new dimension of audio

Immerse yourself in the fuller, multidimensional sound of Dolby Atmos®. Hear what you've been missing in shows, movies, and music, listening with greater depth, clarity, and details than ever before. Unlock new levels of emotion in your favorite songs, drawing you closer to the artists you love.

Stereo speakers

### Sound as it should be

You want your favorite entertainment to sound crisp, clear, and loud. With two large stereo speakers, you can listen with improved bass, cleaner vocals, and even more clarity at higher volumes. And since the speakers are working together, sound travels from one to the other to match the action on screen.

Hi-Res Audio<sup>8,9</sup>

### Studio-quality sound. Minus the studio.<sup>8,9</sup>

Listen to professional-level audio thanks to the Hi-Res certified sound system.<sup>8,9</sup> With wider dynamic range and 3x more data rate, you won't miss any details.<sup>9</sup> You just experience music as the artist intended, listening to Hi-Res audio on certified streaming apps, on both wired and wireless headphones or external speakers.<sup>8</sup>

## Performance

Summary (Cusco ROW) [For LATAM + Japan]

### Engineered to excite

Experience the speed of a Snapdragon® 6 Gen 1 processor, giving you fast, reliable performance with outstanding battery efficiency. Store 256GB of photos, videos, and games without breaking a sweat.<sup>4,10</sup> And turn your unused storage into virtual RAM whenever you need some extra speed using RAM Boost.<sup>11</sup>

Summary

### Engineered to excite

Accelerate performance with the Snapdragon® 7s Gen 2 processor, powering advanced photography features and intensive gaming—all with unbelievable battery efficiency. Store up to 256GB of photos, videos, and games without breaking a sweat.<sup>4,10</sup> And turn your unused storage into virtual RAM whenever you need some extra speed using RAM Boost.<sup>11</sup>

Storage<sup>4,10</sup>

### **Hold everything**

Never give storage a second thought. With up to 256GB built in, you have tons of room for photos, movies, songs, apps, and games.<sup>4,10</sup>

RAM Boost

### **Go faster on the fly**

RAM Boost<sup>11</sup> temporarily turns storage into virtual RAM whenever you need some extra speed. The RAM Boost<sup>11</sup> feature is on by default and your phone will automatically adapt, adding extra RAM whenever it's doing a lot of heavy lifting. The result? You can open apps faster and keep more open at the same time for smoother multitasking.

## Security

Moto Secure → Summary

### **Security and privacy. All in one place.**

Moto Secure is your go-to destination for all the vital security and privacy features on your phone. We've made it easy. Manage network security, control app permissions, and even create a secret folder for your most sensitive data. Whether it's making sure Google Play downloads are safe or adding an extra layer of protection, Moto Secure is all you need to know to help keep threats at bay.

Moto Secure → Secure folder

### **Lock up sensitive apps**

Protect your most sensitive apps and media for added peace of mind. A secure folder keeps your work and personal information hidden away, requiring a separate PIN for access. You can even disguise the folder with a fake name and icon to fool thieves. Plus, the new Files manager makes it even easier to use your files. Move them back and forth from the folder, back them up to a PC, and even share files right from the folder.

Moto Secure → Auto lock

### **Lock your phone automatically**

Keep sensitive data safe even if your phone is lost or stolen. Moto Secure can detect if your phone is being accessed outside of trusted places using GPS and Bluetooth<sup>®</sup> disconnections, and then locks your device automatically.

Moto Secure → Security check-up

### **Strengthen security over time**

Help prevent your phone from being compromised by malicious software. Security Check-up actively scans the firmware on your device looking for

threats and vulnerabilities, and then provides recommendations to make sure you stay protected.

Moto Secure → Phishing detection

### **Keep phishing threats at bay**

Using artificial intelligence, the Moto Secure app can identify and warn you about potential threats associated with a suspicious link or website—even before you open the page.

Moto Secure → Network protection

### **Connect with confidence**

You should feel safe when connecting to Wi-Fi and cellular networks. Help prevent spoofing by blocking 2G connections. Receive warnings if you connect to an unsecure network—or you choose a weak protocol at a hotspot. You can even block apps when your phone's on an open network.

Moto Secure → Lock screen security

### **Keep Wi-Fi locked up**

Make sure that Wi-Fi can't be turned off without first unlocking your phone. That way if you lose your phone, potential thieves are locked out.

Moto Secure → Pin pad scramble

### **Mix things up**

Pin pad scramble shuffles the numerical layout of the entry screen, so prying eyes can't memorize the pattern of the numbers you press.

Moto Secure → Privacy dashboard

### **Make sure private things stay that way**

Know which apps have accessed your camera, microphone, and location during the past 24 hours. Your phone will do all the detective work. Of course, you're still the one in control. Using the Permissions manager you can see exactly what each app can access, ensuring they only have access to things they're supposed to.

Fingerprint sensor on display

### **Now you see it**

New optical sensing technology can read your fingerprint through the display glass, so it appears on screen only when you need it, then discreetly fades away.

ThinkShield

### **Protect what matters**

Data privacy matters to you, so it means everything to us. That's why there's ThinkShield®, which enhances protection at every level from the factory to the

phone. With a suite of hardware and software security features that meet the highest standards, you know your data is better protected from malware, phishing, and other threats.

## Additional features

### Gestures

#### **You act. It reacts.**

With Gestures, your simple actions make everyday interactions easier. Whether it's a twist of your wrist to open the camera, chopping down twice to turn on the flashlight, or double tapping the back of your phone to launch an app, you can use your favorite features in a way that's natural and intuitive.

### Family Space

#### **Your phone. Their space.**

Family Space creates a “safe space” on your phone where kids can learn and play. Set limits on screen time, control access to apps, and create multiple profiles, so everyone is free to explore on their own.

### Moto Unplugged

#### **Stay in the moment**

Moto Unplugged helps you take a break from your smartphone, removing distractions so you can be more present. Setup is simple. Choose any essential apps and contacts you still want available. Then whenever you want to unplug, select a time frame and start your digital break. With Moto Unplugged, it's easy to be in the moment—and still be connected.

### Moto Connect<sup>12</sup>

#### **Unleash your phone on the big screen**

Your smartphone has power just waiting to be unleashed. That's why there's Moto Connect,<sup>12</sup> which amplifies everything your phone is capable of. Play your favorite mobile games on your big screen TV. Feel like you're right in the room during video calls. And use your apps on a desktop display, giving you more space to work and play.

### Ready For<sup>13</sup>

#### **Do twice as much**

Access your phone apps and your PC files all on the same screen. Just open up Ready For and you're ready to go. Then work on two files at once. You can even move files back and forth between your devices—sharing is a snap.<sup>13</sup>

### NFC<sup>14</sup>

## Tap to pay. Tap to share.

Use NFC to quickly share contacts, pictures, and videos. Or just hold your phone near an NFC terminal to make a purchase at the store. It's fast with enhanced security, and there's no need to carry cash or credit cards.<sup>14</sup>

### Android

#### Stay fresh over time

Keep up with the latest version of Android by getting three OS upgrades, guaranteed. You'll enjoy the latest innovations, while knowing your phone is running as smoothly as ever.

### Eco-friendly packaging

#### Built for a better tomorrow

Your new **motorola edge** is more than just an advanced phone. It's also pushing the boundaries of sustainable packaging and product design. It comes in an eco-friendly box, which is plastic-free, features natural soy ink printing, and uses recycled and recyclable materials. It's just another way Motorola is working toward reducing our impact on the environment, using smart technology to build a more sustainable future for us all.

**[1] - IP68 Underwater Protection**

Water, splash and dust resistance were tested to IP68 standards under controlled laboratory conditions. Withstands immersion in up to 1.5 meters of fresh water for up to 30 minutes. Exposure to conditions beyond this rating are not covered by warranty. Resistance will decrease as a result of normal wear. Not designed to work while submerged underwater. Do not expose to pressurized water, or liquids other than fresh water. Do not attempt to charge a wet phone. Not waterproof.

**[2] Charging: Power for the day In 15 minutes**

Battery must be substantially depleted; charging rate slows as charging progresses. All battery life claims are approximate and based on the median user tested across a mixed use profile (which includes both usage and standby time) under optimal network conditions. Actual battery performance will vary and depends on many factors including signal strength, network and device settings, temperature, battery condition, and usage patterns.

**[3] Camera: 32x more focusing with all-pixel focus**

As compared to traditional phase detection autofocus.

**[4] Memory/Storage/Materials/Color options**

Varies by market. Check with your carrier or retailer for availability.

**[5] Camera: Audio Zoom**

Audio Zoom activates only when zoomed in at least 2X.

**[6] Camera: Auto Smile Capture**

Auto Smile capture can recognize up to 5 faces/people in the same frame.

**[7] Display: Refresh rate**

Actual refresh rate may be less and will vary based on app/content limitations and requirements, device mode settings, and other factors.

**[8] Audio: Hi-Res**

May be used with Hi-Res compatible headphones, external speakers and apps only. Check applicable devices and apps to determine compatibility.

**[9] Audio: Hi-Res data rate and dynamic range**

When compared to 16-bit/96dB CD quality.

**[10] - Storage**

Available user storage is less due to many factors, including operating system, software and functions utilizing part of this capacity; may change with software updates.

**[11] RAM Boost**

RAM Boost extended RAM requires use of phone's internal storage as virtual memory, decreasing storage capacity; available user storage is less while in use. Available RAM is less due to operating system, software and other functions; may change with software updates. Features vary by market.

**[12] Moto Connect (Wireless)**

*Moto Connect wireless connection is supported with TVs that support Android smartphone screen mirroring (Miracast) only. Bluetooth® accessories sold separately.*

**[13] Ready For**

*Ready For is available on selected devices, and on Windows 10 and 11. Visit the [FAQ page](#) for a full list of device and software compatibility. Requires PC app download. PC and mobile device to connect wirelessly must share the same Wi-Fi AP (access point) OR must be connected via USB-C cord.*

**[14] NFC**

*NFC-supported payment terminal and app required. Requires fingerprint authorization for purchase.*
