Crumpet

Extra large capacity

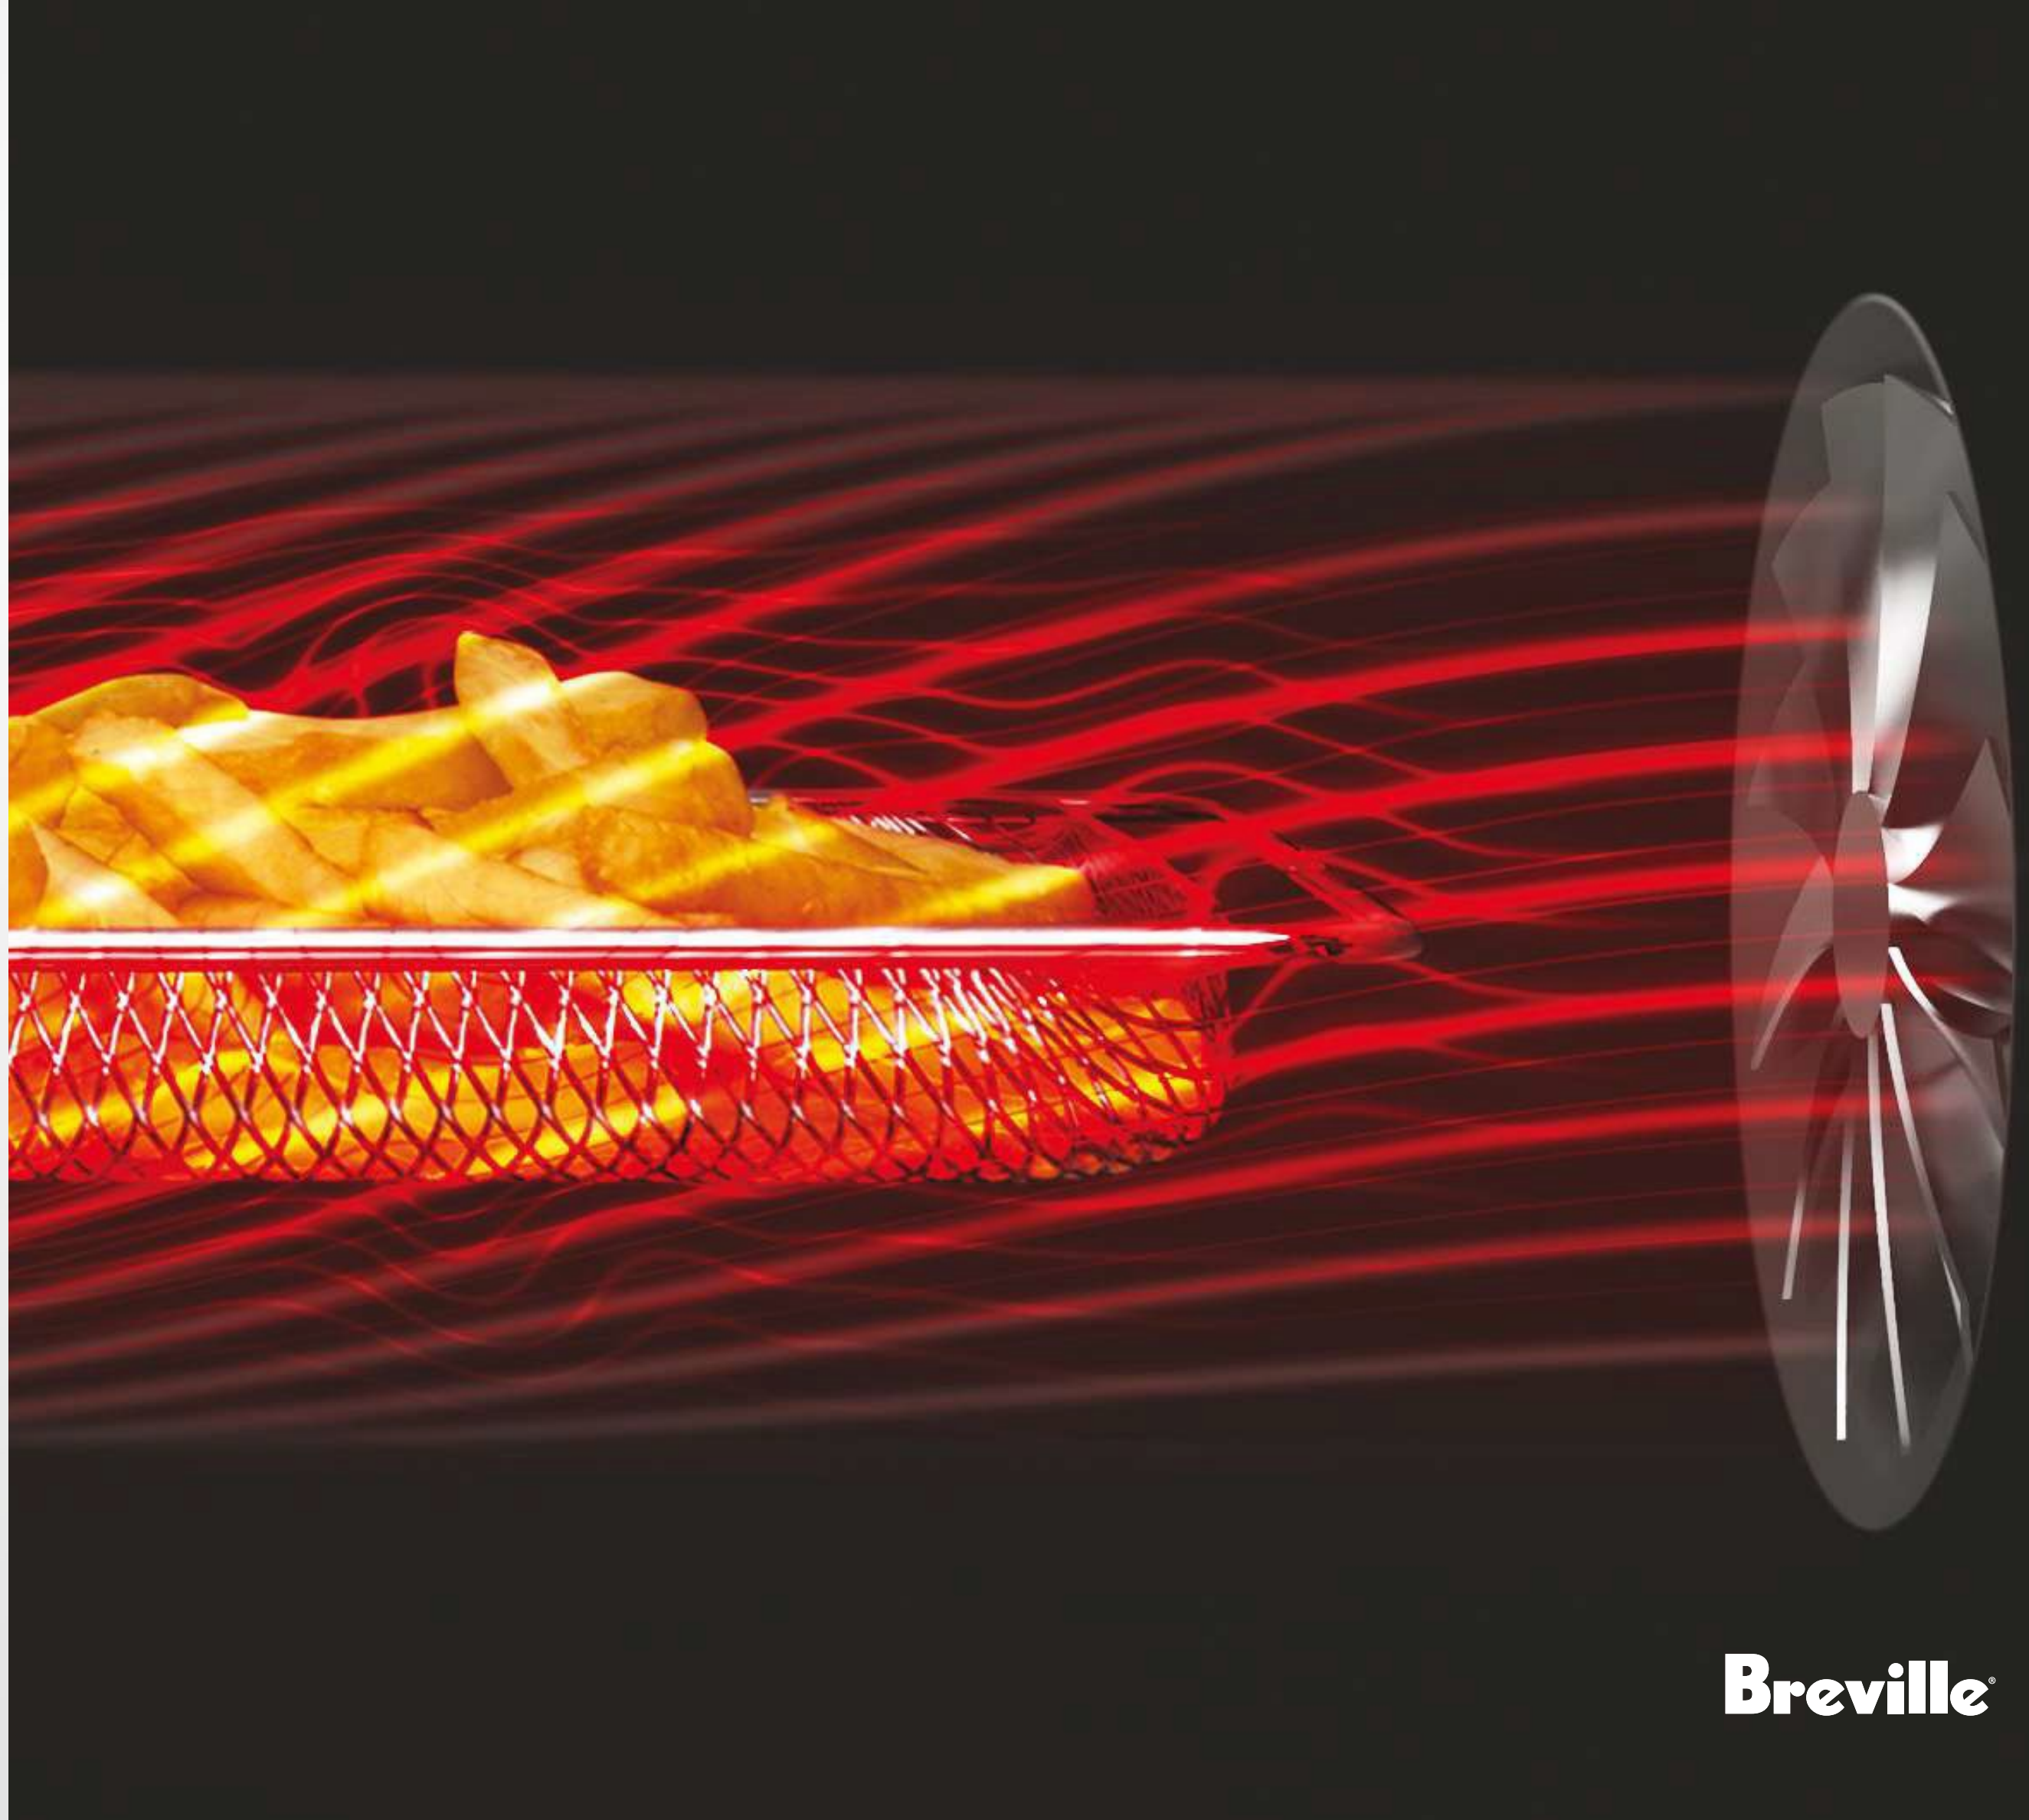

The 28 litre interior will toast up to 9 slices of bread at one time, air fry up to 1kg of favourites like French fries and chicken wings, roast a 6kg turkey, slow cook with a Dutch oven up to 4.7L and comfortably fit most 23 x 33 cm pans and 12 cup muffin trays.

Breville

Dual speed convection

Convection can reduce cooking time by up to 30%. It speeds the cooking process by raising hotter air and sinking colder, less dense air for quicker heating. Super Convection delivers extreme air flow, ideal for Air Fry.

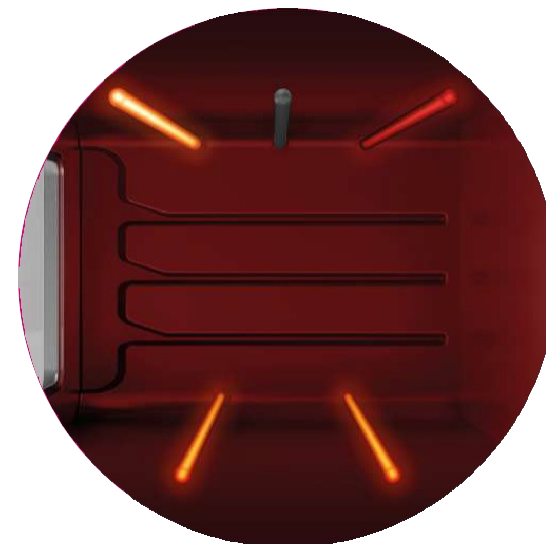

Breville®

All made possible by the Element iQ[®] System

Steers power to where and when it's needed to
create the ideal cooking environment.

Element iQ[®] system

Smart algorithms steers power to the independent heating elements where and when it's needed to create the ideal cooking environment for your meal.

Breville[®]

LCD display

Easily access the built-in smart functionality, choose from 14 cooking functions. Integrated oven light automatically turns on at the end of cooking cycle or can be switched at the touch of a button.

View your progress

Our Smart Oven Air fryers have a generous window so you can keep an eye on your food without having to open the door.

Almost there... just A Bit More™

Whatever the function, whatever the food – sometimes you just need a bit more.
Add a bit more cooking time at the press of a button.

A Breville Smart Oven Air Fryer XL is shown with its door open, revealing a tray of roasted vegetables. In front of the oven are several plates of food: a plate of salmon with cherry tomatoes, a bowl of golden french fries, a bowl of fried chicken, and a small bowl of dipping sauce. A lime wedge is also visible.
