HOW TO USE THE 25MM CERAMIC CURLER

IMPORTANT:

Hair that has been heavily bleached or chemically treated should only use the low heat setting on this product. Please consult your hairdresser on using heated appliances if you have any concerns about the condition of your hair.

CAUTION:

This is a high-heat appliance. Care must be taken to avoid the hot surfaces of the appliance coming into contact with the skin (e.g. scalp, neck ears, face, etc.) as the curler can, particularly if held too close, cause discomfort or even burn.

BEFORE USING

- Remove all packaging & point of sale labels before use.
- Remove plastic cover from plug before use (used to protect it from damage during transportation).

OPERATING INSTRUCTIONS

Wash, condition & dry your hair as normal.

Ensure your hair is combed through & tangle-free.

1. Plug your curler into a 220-240V- suitable power outlet & place on a heat protective, flat level surface.
2. Press the 'I' button to turn your curler on.
3. The red indicator light will turn on & start to flash. At this point your curler will start heating up. Once the temperature you have selected has been reached, the red light will then stop flashing.
4. Divide your hair into equal sections & comb section once more before curling.
5. Press down on the clamp lever, place the curling tong half way up the section of hair & distribute the hair evenly between the clamp & tong. Gently pull the curling tong down to the tips of your hair.
6. Wind the section as far as you want curled (being careful not to let the curling tong touch the scalp). Hold in place for a few seconds depending on temperature & length of your hair.
7. Unroll once the hair is warm (not hot) to the touch by pressing down on the clamp lever to release your hair.
8. Repeat this through all sections
9. After use, turn your curler off by pressing the 'O' button.
10. To "set" your curls, wait until your hair is completely cooled before brushing or combing through.

Allow curler to cool before storing.

VARIABLE HEAT SETTINGS

Please ensure you choose the required temperature setting according to your particular need & hair type.

1-4	Delicate, fine, bleached hair
5-7	Average to thick treated hair
8-10	Normal, thick or wavy hair

AUTOMATIC SHUT-OFF

This curler has an automatic shut-off feature for added safety. If the curler is switched on for more than 72 minutes continuously, it will automatically switch off. If you wish to continue using the curler after this time, simply press the 'I' button then turn the temperature dial to your desired setting.

HOW TO STYLE WITH THE 25MM CERAMIC CURLER

TIGHTER BOUNCIER CURLS

For a sleek, glamorous look; Roll less hair in sections, in the same direction.

FREE-FLOWING CURLS

For a more voluminous look; Roll more hair in sections, alternating from wrapping sections of hair under & over the curling tong so that the curls bounce off each other.

EXPERT TIP

Use a spritz of hold hair spray to prep hair before using - this will not only protect the hair from the heat of the curler, but also set your curls & ensure a longer-lasting hold.
