RRP AUS $899.00

Product Details

FEATURES

Reverse Cycle Air Conditioner

Remote Control

All-in-One Design

Fresh Air Return

BENEFITS

Be cool in no time at all
Ever popular, window/wall models give you the comfort of reverse cycle air conditioning without the need for expensive installation. In fact, some models are so relatively easy to install you could even do it yourself.

Control from your armchair
The remote-control unit lets you conveniently control all functions.

Simple, economic and reliable
Because there are no separate indoor and outdoor units, its easier to install a window wall cooling only model. And because its a Westinghouse, you know it is reliable and built to last.

Compact design
The super compact design means that window wall cooling only air conditioners are discreet and unobtrusive in your home. They are also perfect for cooling smaller family homes and space-restricted areas.

Fresh air delivery
The fresh air return provides additional ventilation to your room and can also assist in humidity control. The easy-to-service dust filter helps remove dust and other larger airborne particles for cleaner air.
