

RecoveryTherm Knee

Four advanced therapies for comprehensive knee recovery.

Step into the future of wearable knee therapy with RecoveryTherm Knee. This innovative device combines four therapies – cold, heat, contrast and vibration – for a comprehensive recovery experience. RecoveryTherm Knee is designed with Cryothermal Technology™ for precise, science-backed temperatures and germanium fabric to increase circulation and boost your body's natural healing process. This powerful combination reduces pain, improves range of motion and decreases inflammation. Whether you're recovering from a minor knee injury, managing chronic knee pain or preparing for physical activity, RecoveryTherm Knee gives you the advanced, effective relief and recovery you need.

Key Benefits

- Treat injuries
- Reduce inflammation
- Relieve pain
- Accelerate recovery
- Improve mobility

Key Features
